

REMARKS

The foregoing amendments improve form and, at two locations in claim 3, correct typographical errors. Further, the amendments in claims 12/10 and 13/11 are consistent with the antecedent support of "a pulse width modulation control" in the respective second lines of independent claims 1 and 2 from which claims 12 and 13 ultimately depend, through claims 10/1 and 11/2, respectively.

No new matter is presented.

Approval and entry of the foregoing amendments are respectfully requested.

If there are any additional fees associated with filing of this Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
